## 1. Introduction

### 1.1. Overview

This document sets out the profiles of the different types of qualified certificates for electronic signature issued by ANF Autoridad de Certificación:

- **Certificate for Electronic Seal** (*QSealC*)
- **Certificate for Electronic Seal for Public Administration** (*QSealC AAPP*)
- **Certificate for Electronic Seal for PSD2** (*QSealC PSD2*)

The Certification Policies associated with these certificates are published and accessible on ANF ACs website: <https://www.anf.es/en/repositorio-legal/>

To prepare these profiles, the following provisions have been taken into account:

- **Regulation (EU) No 910/2014** of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market and repealing Directive 1999/93/EC (eIDAS Regulation).
- **ETSI EN 319 412** Electronic Signatures and Infrastructures (ESI); Certificate Profiles (all 5 parts)
- **ETSI TS 119 495** Electronic Signatures and Infrastructures (ESI); Sector Specific Requirements; Qualified Certificate Profiles and TSP Policy Requirements under the payment services Directive (EU) 2015/2366
- **IETF RFC 3739**. Internet X.509 Public Key Infrastructure. Qualified Certificates Profile
- **Política de Firma y de Certificados de la Administración General del Estado**: Anexo 2: Perfiles de certificados electrónicos

### 1.2. Common aspects

All certificates issued under this policy are in accordance with X.509 Version 3 standard.

As ETSI EN 319 412-2 indicates, the size of the *givenName*, *surname*, *pseudonym*, *commonName*, *organizationName* and *organizationUnitName* fields can be longer than the limit established in IETF RFC 5280.

Within the certificates, besides the already standardized fields, there are also included a group of ANF AC OIDs (1.3.6.1.4.1.18332.x.x) which provide information in relation to the subscriber, or other information of interest. The complete list of OID codes and the information associated to the same may be consulted in the section "Proprietary fields of ANF AC" of the Certification Practice Statement of ANF AC.

Fields with OID 1.3.6.1.4.1.18838.1.1 are proprietary of the Spanish State Tax Administration Agency (Agencia Estatal de Administración Tributaria "AEAT"). Fields with OID 2.16.724.1.3.5.x.x, are required and identified in the Identification and Electronic Signature Scheme v.1.7.6 published by the High Council of Electronic Administration.

All literals are entered in capital letters, with the exceptions of the email that will be in lowercase. No more than one space is entered between alphanumeric strings, or at the beginning or end of alphanumeric strings. The inclusion of abbreviations based on a simplification is admitted, provided they do not difficult the interpretation of information.

As ETSI EN 319 412-2 indicates, the size of the *commonName*, *organizationName* and *organizationUnitName* fields can be longer than the limit established in IETF RFC 5280.
